

English

We are growing in confidence more and more with our reading. Lots of children are choosing to read for pleasure and are using their reading logs at home to show us just how much they love to share their reading with their friends and family.

This term we have some more exciting texts to explore, in Year 1 one of our texts is the Disgusting Sandwich! In Year 2, we have started to explore The Lighthouse Keeper's Lunch. We smelt some mustard and decided it would be disgusting for the seagulls to eat! We are looking forward to writing our own version on of a defeating the monster tale. We will also practice our letter writing skills to introduce ourselves to our new teachers next year.

We will continue with daily Read Write Inc sessions to help us with our sound recognition, blending and fluency. With the National Phonics Screening Check coming up we are trying hard in school to give the children as many opportunities to practice their sound knowledge as possible.

Science

In science we will investigate the different types of habitats animals live in as well as what animals need to survive.

RE

In RE, will be asking and answering lots of big questions. How was the world created? Who is God? Where is God? Where do religious people look to find some answers to big questions? Where do people without a religion get their answers? We can't wait to explore the different answers.

Key Stage 1 Summer Term 2024

History

We will be studying seaside holidays in the past. We will learn why Victorians went to the seaside, how they travelled to the coast and learn how holidays have changed in the last 100 years. We will also learn about the heroine Grace Darling.

Maths

As mathematicians we will be investigating multiplication and division using the skills we have learnt in previous terms. We will also be exploring different types of measurements.

Year 2 will continue to study the four operations to improve our arithmetic skills. We will also study fractions. We will then investigate various measurements including time, length, height, mass and capacity as well as temperature. We will also study statistics and position and direction.

Art & Design Technology

In art we will be creating sculptures using clay. We will use different techniques to create a clay tile based on nature and then look at creating a picture made from fabric.

In DT we will be learning about where our fruit and vegetables come from, practising out cutting and chopping skills and making fruit smoothies.

PSHCE

Our unit on relationships looks at families, friendships, conflict, secrets, keeping safe and trust.

Our final unit of the year is Changing Me.
